

## Project Outline

Programme	Afghanistan Humanitarian Crisis Response Programme In Emergency response period				
Project Name	Items distribution, hygiene awareness raising and women's protection support project for needy families in Kunar, Afghanistan				
Start Date	27 <sup>th</sup> August, 2021	End Date	26 <sup>th</sup> August, 2022	Days	365 Days
Oraganisation Name			Person in charge		
Project Outcome	<p>1. Food shortages among internally displaced persons and needy people in the target areas of Kunar Province will be temporarily controlled and the risk of the new coronavirus ("COVID-19") will be reduced through the promotion of prevention awareness.</p> <p>2. Women's and men's awareness of women's protection issues will be increased in the target areas of Kunar province, and the response capacity of the entire Shura will be strengthened as participants nominated by men and women Shuras will work on protection issues as members of the Shura after the training.</p>				
Project Overview	<p>Kunar Province, the target area of this project, is a major transportation hub between the neighboring countries and central Afghanistan. It is one of the areas where the spread of COVID-19 has been fast and medical facilities are under pressure. The recent political unrest has resulted in an influx of 800 to 1,000 internally displaced families into the province. In addition, Kunar province is one of the most conservative provinces in Afghanistan and the province lacks adequate social services such as protection for women. In the food sector, about 124,000 people are at crisis level (Phase 3) and about 50,000 people are at emergency level (Phase 4) with regard to food security, out of a total population of 700,000 in the province. Meanwhile, in the protection sector, 230,000 women, 60% of the female population of 386,000, are in need of protection assistance. In Kunar district, there are many hard-to-reach areas that are difficult to reach and require a comprehensive support. In order to meet the immediate needs of the needy people in the target districts of Kunar Province who are seriously threatened by the spread of COVID-19, we will 1) distribute food shortages and raise awareness and distribute hygiene items necessary for the prevention of COVID-19 infection. 2) To address the protection issues of vulnerable women by providing training on GBV, hygiene, child care and leadership to target districts to help them improve their livelihoods and promote social independence.</p>				
Description of project				Beneficiaries	
<p>Component 1: Emergency food distribution and infection control</p> <p>This component will be implemented for 1,245 needy families in Khas, Kunar, Shigal and Chawki districts of Kunar district, where many IDPs and returnees live.</p> <p>This component aims to distribute food and hygiene items and raise awareness on COVID-19 infection prevention to 1,245 needy families in Kunar, Shigal and Chawki districts of Kunar province.</p> <p>Target Outputs</p> <p>1. 1,245 households in the target districts have received COVID-19 infection prevention awareness raising and correct information on infection prevention.</p> <p>2. 1,245 households in the target districts received food equivalent to about 3 months' supply.</p>				<p>Beneficiaries: 1,245 households / approx. 8,715 people</p> <p>(Average number of persons per household: 7)</p>	

<p>Activities for Outputs</p> <ul style="list-style-type: none"> <li>1-1. Permission from the government to implement the project</li> <li>1-2. Coordination with relevant government agencies and communities</li> <li>1-3. Procurement of food and supplies</li> <li>1-4. Awareness raising and distribution of food and supplies</li> <li>1-5. Monitoring</li> </ul>	
<p>Component 2: Protection and empowerment of women</p> <p>This component aims at empowering women in the target districts to acquire basic knowledge on protection, such as hygiene and child care, and to find solutions how they should respond to their own protection issues and difficulties in life.</p> <p>Outputs to be achieved</p> <ul style="list-style-type: none"> <li>1. hygiene awareness sessions was held and participants' knowledge of hygiene prevention was improved.</li> <li>2. Childcare sessions was held and participants' knowledge of childcare was improved.</li> </ul> <p>[Activities for Outputs</p> <ul style="list-style-type: none"> <li>2-1. Coordination with relevant government agencies, resident organizations and clusters</li> <li>2-2. Support Shuras implementing protection support for men and women in the region</li> <li>2-3. Distribute protection and empowerment kits and conduct awareness-raising activities</li> <li>2-4. Organising Community Based Dialogue (CBD)</li> <li>2-8. Monitoring</li> </ul>	<p>Beneficiaries: About 100 women (of whom 8 are potential female leaders) and 150 men (of whom 8 are leaders) living in the project area.</p>

Theoretical Framework

Current situation ( before the start of project)	Aimed Outcome	Indicators and targets to measure the achievement of outcomes
<p>The project target area is one of the areas where many internally displaced persons and returnees who are in need of livelihood originally live, and due to the insecurity of their livelihood, the spread of COVID-19 infection is fast and the medical facilities are in a tight situation. In the food sector, about 124,000 people are at crisis level (phase 3) and about 50,000 people are at emergency level (phase 4) with regard to food security, out of a total population of 700,000 in the province. In the protection sector, 230,000 women, 60% of the female population of</p>	<p>1. The risk of contracting new coronaviruses ("COVID-19") will be reduced through the distribution of food and supplies to internally displaced persons (IDPs) and people in need in the target areas and the promotion of prevention awareness. (hereinafter referred to as "COVID-19").</p> <p>2. In the target areas of Kunar Province, women's and men's awareness of women's protection issues will be increased.</p>	<p>1. 80% of beneficiary households are using COVID-19 infection control measures based on correct information (pre- and post-sample monitoring)</p> <p>2. 80% of target men and women have a good understanding of the protection issues.</p> <p>3. the percentage of respondents who are willing to make a commitment to women's empowerment-related activities in the future: 80% (pre- and post-sample monitoring, comprehension tests, interviews and questionnaires)</p>

<p>386,000, are in need of some form of protection assistance. In Kunar Province, there are many hard-to-reach areas that require complex support.</p>				
<p>Current situation (before the end of project)                  1. People living in the target areas do not have enough food for their daily needs as their income is reduced due to limited economic activities. They are not aware of the prevention of COVID-19 infection and do not have the necessary information and preventive measures.</p>	<p>Outputs to aim for Component 1 [Emergency food distribution and infection prevention measures]                  1. 1,245 households in the target districts have received COVID-19 infection prevention awareness raising and correct information on infection prevention.                  2. 1,245 households in the target districts received 3 months' worth of food.</p>	<p>Indicators/target values to measure the achievement of outputs (confirmation method)                  1-1. More than 80% of the beneficiaries have improved their knowledge of hygiene and have incorporated it into their daily lives (distribution list and monitoring).                  1-2. 1,245 households have received food and supplies (distribution list and monitoring).                  1-3. More than 80% of the beneficiaries said that the food and supplies distributed were useful (interviews, monitoring, questionnaires).</p>	<p>Activities to achieve the outputs                  1-1. Co-ordination with relevant authorities, residents' organizations, representatives and clusters                  1-2. Procurement of supplies                  1-3. Awareness raising and distribution                  1-4. Monitoring                  1-5. Reporting                  Activities to achieve the outputs                  1-1. co-ordination with relevant authorities, residents' organizations, representatives and</p>	<p>Prerequisites                  Risk                  No deterioration of public safety in the target area                  No further spread of COVID-19                  Clashes between armed groups and government forces escalate                  Restrictions due to the spread of COVID-19</p>

			<p>clusters</p> <p>1-2. Procurement of supplies</p> <p>1-3. Awareness raising and distribution</p> <p>1-4. Monitoring</p> <p>1-5. Reporting</p>	
<p>2. In the target districts, both communities and actors have low awareness of women's protection issues. In addition, women do not have basic knowledge of necessary hygiene and child protection in the context of poor shelter conditions, nor do they have the skills to live independently.</p>	<p>Component 2 [Protection and empowerment of women] Gaining knowledge on protection</p> <p>1. hygiene awareness sessions was held and participants' knowledge of hygiene prevention was improved.</p> <p>2. Childcare sessions were held and participants' knowledge of childcare was increased.</p>	<p>Acquiring knowledge about protection</p> <p>1-1. One group working on women's protection support is established within the local women's shura.</p> <p>1-2. 100 women households receive protection and empowerment kits in door-to-door visits (distribution list).</p> <p>1-3. 100 households of women will participate in door-to-door hygiene awareness (list of participants).</p> <p>More than 90% of hygiene awareness participants will have improved their knowledge of basic hygiene and 80% of participants will have incorporated it into their daily lives (interviews, KAP survey, pre- and post-sample surveys, etc.).</p> <p>2-1. 100 households of women will participate in door-to-door child care awareness sessions (list of</p>	<p>2-1. coordination with relevant government agencies, community organizations and clusters</p> <p>2-2. support shuras implementing women's protection support in the region</p> <p>2-3. Distribute protection and empowerment kits and conduct awareness-raising activities</p> <p>2-4. Organization of Community Based Dialogue (CBD)</p> <p>2-5. monitoring</p>	<p>✓ No deterioration of public safety in the target area</p> <p>✓ No further spread of COVID-19</p> <p>✧ Clashes between armed groups and government forces escalate</p> <p>✧ Restrictions due to the spread of COVID-19</p>

		<p>participants).</p> <p>2-2. More than 90% of the participants in the child care awareness sessions improve their knowledge about child care, and 80% of the participants also incorporate child care into their daily lives (interviews, KAP survey, pre- and post-sample surveys, etc.).</p> <p>3-1. 150 men will participate in Community Based Dialogue (CBD).
